Network Master Pro MT1000A

CPRI RF Module MU100040B

MT1000A Network Master Pro

Introduction

The MT1000A Network Master Pro is a handheld, battery-powered tester designed to facilitate the installation and maintenance of cellular networks. CPRI RF measurements are configured and displayed on the 9-inch color touch screen. The MU100040B CPRI RF module for the MT1000A Network Master Pro adds CPRI RF measurements to Anritsu's transport and fiber test platform. The modular design of the MT1000A means that it can be configured just for CPRI measurements or combined with the 10G/100G transport module and OTDR module to create the most comprehensive and versatile fiber and transport tester available.
