# EXG X-Series Signal Generators N5171B Analog and N5172B Vector

This configuration guide will help you determine which performance options, software applications, accessories, and services to include with your new EXG or to add as upgrades to an existing EXG.

CONFIGURATION GUIDE

# Configure Your EXG X-Series Signal Generator

This step-by-step process will help you configure your EXG signal generator and choose options to meet your requirements. For detailed specifications, refer to the EXG signal generator data sheet (5991-0039EN).

# N5171B EXG X-Series RF Analog Signal Generator

### Configure your new EXG analog signal generator

| Step 1. Select maximum frequency range (required option; frequency range not upgradeable) |               |                              |  |
|---|---------------|------------------------------|--|
| Description   | Option number | Additional information       |  |
| Frequency range from 9 kHz to 1 GHz   | N5171B-501    | Not compatible with 503, 506 |  |
| Frequency range from 9 kHz to 3 GHz   | N5171B-503    | Not compatible with 501, 506 |  |
| Frequency range from 9 kHz to 6 GHz   | N5171B-506    | Not compatible with 501, 503 |  |
|   |               |                              |  |

| Step 2. Choose connector configuration |               |                        |  |
|--|---------------|------------------------|--|
| Description                            | Option number | Additional information |  |
| Move all connectors to rear panel      | N5171B-1EM    | Not upgradable         |  |

#### Step 3. Choose performance enhancement options

| Description                                   | Option number | Additional information   |
|---|---------------|--|
| AM, FM, phase modulation                      | N5171B-UNT    |  |
| Narrow pulse modulation                       | N5171B-UNW    |  |
| Multifunction generator                       | N5171B-303    |  |
| Instrument security and removable memory card | N5171B-006    |  |
| No internal non-volatile memory               | N5171B-SD0    | Requires firmware B.01.80 or newer   |
| Fast switching                                | N5171B-UNZ    |  |
| High output power                             | N5171B-1EA    |  |
| Flexible reference input (1 to 50 MHz)        | N5171B-1ER    |  |
| Expanded license key upgradability            | N5171B-099    | Option 099 is recommended for anyone considering<br>future upgrades. Option 099 simplifies the upgrade<br>process by enabling upgrades via a license key for<br>Options 1EA and UNZ. Without Option 099,<br>upgrades for these options require purchase and<br>installation of hardware in a field retrofit kit. |

| Step 4. Choose accessory and documentation options |               |  |
|--|---------------|--|
| Description  | Option number |  |
| Rack slide kit                                     | 1CR112A       |  |
| Front handle kit                                   | 1CN106A       |  |
| Rack mount flange kit                              | 1CM110A       |  |
| Rack mount flange kit with front handles           | 1CP104A       |  |
| Front panel cover                                  | N5171B-CVR    |  |
| Hard transit case                                  | N5171B-AXT    |  |
| CD-ROM containing English documentation set        | N5171B-CD1    |  |

#### Step 5. Choose embedded software

Note: The following software can be added at purchase or as an upgrade.

| Description           | Option number | Hardware requirements |
|-----------------------|---------------|-----------------------|
| Avionics (VOR/ILS)    | N5180302B     |                       |
| Pulse train generator | N5180320B     | UNW                   |

| Step 6. Choose calibration options                                      |               |  |
|---|---------------|--|
| Description   | Option number |  |
| Calibration Assurance Plan, Return to Keysight, 5 years                 | R-50C-011-5   |  |
| Calibration Assurance Plan, Return to Keysight, 7 years                 | R-50C-011-7   |  |
| Calibration Assurance Plan, Return to Keysight, 10 years                | R-50C-011-10  |  |
| Keysight Calibration + Uncertainties + Guardbanding<br>(uncredited cal) | N5171B-AMG    | Only available at time of new<br>instrument purchase |
| ANSI Z540-1-1994 Calibration  | N5171B-A6J    | Only available at time of new<br>instrument purchase |
| Commercial calibration certificate with test data                       | N5171B-UK6    | Only available at time of new<br>instrument purchase |

| Step 7. Choose startup assistance service options                               |               |  |
|---|---------------|--|
| Description   | Option number |  |
| Remote scheduled assistance 1 to 999 hours                                      | PS-S10        |  |
| Daily productivity assistance   | PS-S20        |  |
| Signal generator and source basics; half-day, maximum of eight students on site | PS-T10-ASG    |  |

# Upgrade your Existing EXG Analog Signal Generator

Fast license-key upgrades for options that do not require additional hardware:

- 1. Place an order for the upgrade with Keysight and request to receive the software entitlement certificate through email
- 2. Redeem the certificate through the Web by following the instructions on the certificate
- 3. Install the license file using Keysight License Manager
- 4. Begin using the new capability

license-key upgradeable.

| Description                                   | Upgrade number | Requirements | Additional information  |
|---|----------------|--------------|---|
| Instrument security and removable memory card | N5171BU-006    | None         | Hardware and license key upgrade  |
| No internal non-volatile memory               | N5171BU-SD0    | None         | Customer installable - software,<br>license key<br>Requires firmware B.01.80 or newer   |
| Expanded license key upgradability            | N5171BU-099    | None         | Hardware and license key upgrade  |
| High output power                             | N5171BU-1EA    | 099          | Customer installable – software,<br>license key   |
| Flexible reference input (1 to 50<br>MHz)     | N5171BU-1ER    | None         | Customer installable – software,<br>license key   |
| Avionics (VOR/ILS)                            | N5180302B      | None         | If serial number is less than<br>MY/SG/US 5620xxxx - return to<br>Keysight Service Center required for<br>installation. If serial number is greater<br>than or equal to MY/SG/US 5620xxxx<br>- customer installable - software,<br>license key. |
| Multifunction generator                       | N5171BU-303    | None         | Customer installable – software,<br>license key   |
| Pulse train generator                         | N5180320B      | UNW          | Customer installable – software, license key  |
| AM, FM, phase modulation                      | N5171BU-UNT    | None         | Customer installable – software, license key  |
| Narrow pulse modulation                       | N5171BU-UNW    | None         | Customer installable – software, license key  |
| Fast switching                                | N5171BU-UNZ    | 099          | Customer installable – software,<br>license key   |
| Rack slide kit                                | 1CR112A        | None         | Hardware  |
| Front handle kit                              | 1CN106A        | None         | Hardware  |
| Rack mount flange kit                         | 1CM110A        | None         | Hardware  |
| Rack mount flange kit with front handles      | 1CP104A        | None         | Hardware  |
| Front panel cover                             | N5180-40019    | None         | Hardware  |

# N5172B EXG X-Series RF Vector Signal Generator

# Configure your new EXG vector signal generator

| Step 1. Select maximum frequency range (required option; frequency range not upgradeable) |               |  |  |
|---|---------------|--|--|
| Description   | Option number | Additional information                                     |  |
| Frequency range from 9 kHz to 3 GHz   | N5172B-503    | Not compatible with 506                                    |  |
| Frequency range from 9 kHz to 6 GHz   | N5172B-506    | Not compatible with 503                                    |  |
| Frequency range from 9 kHz to 7.2 GHz   | N5172B-FRQ    | Requires 506 and N5182BX07 Frequency Extender <sup>1</sup> |  |

1. The N5182BX07 Frequency Extender is orderable separately. Refer to the N5182BX07 configuration guide for more information.

| Step 2. Choose connector configuration |               |                        |
|--|---------------|------------------------|
| Description                            | Option number | Additional information |
| Move all connectors to rear panel      | N5172B-1EM    | Not upgradable         |

| Step 3. Choose performance enhancement options |
|--|
|--|

| •   |               |  |
|---|---------------|--|
| Description                                       | Option number | Additional information   |
| AM, FM, phase modulation                          | N5172B-UNT    |  |
| Enhanced dynamic range                            | N5172B-UNV    | Requires 653   |
| Narrow pulse modulation                           | N5172B-UNW    |  |
| Fast switching                                    | N5172B-UNZ    |  |
| Multifunction generator                           | N5172B-303    |  |
| Instrument security and removable memory card     | N5172B-006    |  |
| Internal solid-state memory                       | N5172B-009    |  |
| No internal non volatile memory/solid state drive | N5172B-SD0    | Not compatible with option 009 and 660<br>Requires firmware B.01.80 or newer   |
| High output power                                 | N5172B-1EA    |  |
| Differential I/Q outputs                          | N5172B-1EL    | Requires 653   |
| Flexible reference input (1-50 MHz)               | N5172B-1ER    |  |
| LO in/out for phase coherency                     | N5172B-012    |  |
| Expanded license key upgradability                | N5172B-099    | Option 099 is recommended for anyone considering<br>future upgrades. Option 099 simplifies the upgrade<br>process by enabling upgrades via a license key for<br>Options 1EA, UNV, and UNZ. Without Option 099,<br>upgrades for these options require purchase and<br>installation of hardware in a field retrofit kit. |

| Step 4. Choose baseband generator options                      |               |                              |  |
|--|---------------|------------------------------|--|
| Description  | Option number | Additional information       |  |
| ARB baseband generator<br>(60 MHz RF bandwidth, 32 MSa)        | N5172B-653    |                              |  |
| Upgrade baseband generator from 60 to 120 MHz RF bandwidth     | N5172B-655    | Requires 653                 |  |
| Upgrade baseband generator from<br>120 to 160 MHz RF bandwidth | N5172B-657    | Requires 653 and 655         |  |
| Upgrade baseband generator memory<br>from 32 to 256 MSa        | N5172B-021    | Requires 653                 |  |
| Upgrade baseband generator memory<br>from 32 to 512 MSa        | N5172B-022    | Requires 653                 |  |
| Upgrade baseband generator with<br>real-time capability        | N5172B-660    | Requires 653                 |  |
| Digital output connectivity with the N5102A                    | N5172B-003    | Requires 653, not upgradable |  |
| Digital input connectivity with the N5102A                     | N5172B-004    | Requires 653, not upgradable |  |

## Step 5. Choose Signal Studio and embedded software

Note: The following software can be added at purchase or as an upgrade.

| Product<br>number | Description   | Hardware requirements    | Recommended hardware options         |
|-------------------|---|--------------------------|--------------------------------------|
| Cellular com      | nmunications  |                          |                                      |
| N7600C            | Signal Studio for W-CDMA/HSPA+ (ARB and real-time)                      | 653<br>660 for real-time | 403, 503, UNV                        |
| N7601C            | Signal Studio for cdma2000 <sup>®</sup> /1xEV-DO<br>(ARB and real-time) | 653<br>660 for real-time | 403, 503, UNV                        |
| N7602C            | Signal Studio for GSM/EDGE/Evo (ARB<br>and real-time)                   | 653<br>660 for real-time | 403, 503, 1ER, UNV, UNZ              |
| N7612C            | Signal Studio for TD-SCDMA/HSDPA  | 653                      | 403, 503, UNV                        |
| N7624C            | Signal Studio for LTE/LTE-Advanced FDD<br>(ARB and real-time)           | 653<br>660 for real-time | 403, 506, 655, UNV                   |
| N7625C            | Signal Studio for LTE/LTE-Advanced TDD (ARB and real-time)              | 653<br>660 for real-time | 403, 506, 655, UNV                   |
| N7626C            | Signal Studio for V2X   | 653, 506                 | 403, 1EA, 1ER, 009, 655,<br>UNV, UNZ |
| N7630C            | Signal Studio for Pre-5G  | 653                      | 403, 506, 655, UNV                   |
| N7631C            | Signal Studio for 5G NR   | 653                      | 403, 506, 655, UNV                   |
| Wireless cor      | nnectivity  |                          |                                      |
| N7606C            | Signal Studio for <i>Bluetooth</i> ®                                    | 653                      | 403, 506, UNV                        |
| N7607C            | Signal Studio for DFS radar profiles                                    | 653, 506                 | 655                                  |
| N7610C            | Signal Studio for Internet of Things (IoT)                              | 653                      |                                      |

| Step 6. Choose accessory and documentation options |               |  |
|--|---------------|--|
| Description  | Option number |  |
| Rack slide kit                                     | 1CR112A       |  |
| Front handle kit                                   | 1CN106A       |  |
| Rack mount flange kit                              | 1CM110A       |  |
| Rack mount flange kit with front handles           | 1CP104A       |  |
| Front panel cover                                  | N5172B-CVR    |  |
| Hard transit case                                  | N5172B-AXT    |  |
| CD-ROM containing English documentation set        | N5172B-CD1    |  |

| Step 7. Choose calibration options                                   |               |  |
|--|---------------|--|
| Description  | Option number |  |
| Calibration Assurance Plan, Return to Keysight, 5 years              | R-50C-011-5   |  |
| Calibration Assurance Plan, Return to Keysight, 7 years              | R-50C-011-7   |  |
| Calibration Assurance Plan, Return to Keysight, 10 years             | R-50C-011-10  |  |
| Keysight Calibration + Uncertainties + Guardbanding (accredited cal) | N5172B-AMG    | Only available at time of new<br>instrument purchase |
| ANSI Z540-1-1994 Calibration   | N5172B-A6J    | Only available at time of new<br>instrument purchase |
| Commercial calibration certificate with test data                    | N5172B-UK6    | Only available at time of new<br>instrument purchase |
| Step 8. Choose startup assistance service options                    |               |  |
| Description  | Option number |  |
| Remote scheduled assistance 1- 999 hours                             | PS-S10        |  |
| Daily productivity assistance  | PS-S20        |  |

## Upgrade your Existing EXG Vector Signal Generator

Fast license-key upgrades for options that do not require additional hardware:

- 5. Place an order for the upgrade with Keysight and request to receive the software entitlement certificate through email
- 6. Redeem the certificate through the Web by following the instructions on the certificate
- 7. Install the license file using Keysight License Manager
- 8. Begin using the new capability

| Description   | Upgrade<br>number | Requirement<br>s | Additional information   |
|---|-------------------|------------------|--|
| Instrument security and removable<br>memory card        | N5172BU-006       | None             | Hardware and license key upgrade   |
| Internal solid-state memory                             | N5172BU-009       | None             | Customer installable – software, license<br>key  |
| No internal non volatile<br>memory/solid state drive    | N5172BU-SD0       | None             | Customer installable - software, license<br>key and hardware<br>Requires firmware B.01.80 or newer<br>Not compatible with option 009 and 660 |
