

# **RFSG OEM Custom Solutions 1.00** (Sep 2017)

Microwave Signal Generators up to 40 GHz

## Introduction

The RFSG-OEM series is an easy to implement test equipment solution designed to fulfill your signal generation needs. Built on a foundation of high quality and market leading Anapico Signal Sources, the RFSG-OEM series provides the highest output power, low harmonic levels and broadest frequency range amongst signal generators of its size and cost.

This compact signal generator board level assembly features USB, GPIB and Ethernet interfaces ensuring carefree integration within various test environments while improving overall productivity and equipment utilization.

The RFSG-OEM incorporates several product upgrades: reduced spurious, wider dynamic range, higher frequency resolution, higher RF output power, reduced RF off leakage, and an added TRIGGER OUT function. This assembly can be readily integrated into a test equipment rack. Just supply power and cooling.

## Signal Specifications

Please refer to the RFSGXXG and RFSGX010 data sheets. The same key specifications apply for the OEM versions.

## I/Os

### RF

**RF 50 Ohms connector** selectable N, SMA+, K, MCX; MMPX

### Baseband IOs

**ΦM** MCX / BNC connector: input for phase (FM/PM) external modulation.

**REF IN** MCX / BNC connector: input for the reference signal.

**TRIG IN** MCX / BNC connector: trigger input.

**FUNC OUT** MCX / BNC connector: output for the function signal.

**REF OUT** MCX / BNC connector: output for the reference signal.

**AM PULSE** MCX / BNC connector: input for the AM and the PULSE external modulation.

### Remote control and power supply

**USB B** The USB B connector is used to connect the device to a computer.

**LAN** The LAN connector is used to connect the device to a network.

**Power Supply** 6V DC power supply connector (suitable AC-AD supply is included)

# Mechanical Dimensions

All dimensions are given in mm.

Controller Module: 30 mm H x 100 mm W x 206 mm L

RF Module: 30 mm H x 230 mm W x 206 mm L

# General Characteristics

## Remote programming interfaces

Ethernet 100BaseT LAN interface,  
USB 2.0 host & device  
GPIB (IEEE-488.2,1987) with listen and talk (optional)  
Control language SCPI Version 1999.0

**Power requirements** 6.25 ± 0.2 VDC ; 20 W maximum

**Mains adapter supplied:** 100-240 VAC in/ 6 V 6.0 A DC out

**Environmental** (Levels similar to MIL-PRF-28800F Class 3/4)

Environmental stress Samples of this product have been type tested to be robust against the environmental stresses of storage, transportation, and end-use; those stresses to temperature, humidity, shock, vibration, altitude, and power line conditions.

**Operating temperature range** 0 to 50 °C

**Storage temperature range** -40 to 70 °C

**Operating and storage altitude** up to 15,000 feet (4600 m)

**Weight** < 1.0 kg net

**Recommended calibration cycle** 24 months
