

# Signalling Tester

MD8475A MD8475B

Do you use a base station simulator to reproduce any of the world's communications systems on the workbench?

Do you have a hard time preparing complex measurement scenarios?

yes

no

Do you know any complex measurement scenarios that are required for most base station simulators?

no

yes

Q.3

Does your base station simulator meet the latest communications standards?

yes

no

Does your base station simulator meet the existing communications standards?

yes Ans. B
no Ans. A

yes Ans. A
no Ans. B

# Here's the Base Station Simulator It Answers All Your Questions.

### Reproduce the world's communications systems in a small workbench.

As mobile terminals, such as smartphones, become increasingly high performance and diversified to enhance the user experience, carriers are starting to deploy LTE-Advanced technology as the next stage after LTE in speeding-up networks and meeting the needs of smartphone users. Additionally, the automotive world is pushing forward with new innovations, such as the connected car and self-driving vehicles, based on wireless communications technologies.

The Signalling Tester MD8475A/MD8475B is a base station simulator reproducing communications between base stations and UEs. It supports the full range of communication standards including LTE, and the Anritsu SmartStudio user interface, eliminates the need to create complex test scenarios, assuring efficient tests of complex UEs.

Signalling Tester / Base Station Simulator

MD8475B

See page 40 for more details

### For R&D of Automotive Solutions and **Wireless Connectivity**

Signalling Tester / Base Station Simulator

# MD8475A

See page 28 for more details

**Automated Confirmation of Existing Mobile Functions** using SmartStudio Manager

See page 12 for more details

### **POINT 3**

All-in-One Support for LTE and Other Communications Systems

See page 12 for more details

# **SmartStudio** — Changing the Smartphone

# **Test Environment**

# **POINT 1**Scenario-less Mobile Phone Function Tests using SmartStudio

### **Supports Versatile Smartphone Tests**

Complex tests of multifunction smartphones are supported by the all-in-one MD8475A/MD8475B with interactive SmartStudio interface.

### **POINT 2**

Automated Confirmation of Existing Mobile Functions using SmartStudio

SmartStudio Manager helps improve development efficiency by automating checks of existing functions at UE development, such as Voice, SMS send/receive, and other tests.

### POINT 3

### All-in-One Support for LTE and Other Communications Systems

All the world's main communications technologies, such as triple-system LTE/W-CDMA/GSM mobiles and TD-LTE/TD-SCDMA/GSM as well as LTE hybrids, can be tested using the all-in-one MD8475A/MD8475B. (Requires installation of optional units and software for each systems).

### TOPICS

Mobile phones are becoming increasingly multifunctional as the worldwide mobile market expands and diversifies. As a result, mobile developers developing new hardware and services require increasing numbers of tests, such as maximum throughput, VoLTE and handover. As an example, battery tests must now not only include standby consumption, but also measurements while web browsing, video streaming, etc. Anritsu's MD8475A/MD8475B is the ideal cost-effective tool for these complex multiple tests and evaluations.

### **Configuring Multi-cell Test Environment**

Performing UE tests between communications systems (handover tests) usually requires set-up of several measuring instruments and creation of complex scenarios. SmartStudio eliminates these problems by providing a simple test environment for fast and efficient testing.

### **Multi System Configuration**

Roaming and power consumption tests of UEs require multi-cell connections.

The MD8475A supports dual-RF tests. And MD8475B supports up to 8RF tests.

The SmartStudio GUI makes it easy to set multi-system test environments, especially for the latest Carrier Aggregation (CA) wireless standards.

### **Multi-cell Test Configurations**

Tests of UEs moving between cells take the Selection, Redirection, Handover, and other conditions into consideration, depending on the UE and base station conditions. SmartStudio can register these UE and base station conditions, including the RF power, as a test case, making it quick and easy to evaluate UE behaviors and reproduce failures. Test cases are also useful for general UE evaluations when reproducing Handover failures.

### **Small-cell Switching Tests**

Macrocell, small-cell, and femtocell base stations are being installed to provide wide coverage for people moving freely between base stations; SmartStudio provides easy test sequences for preferential capture of small-cells.

### 2-cell Testing Support by SmartStudio (MD8475A)

✓: Supported

Cell 2	LTE FDD/TDD	W-CDMA/HSPA/ HSPA Evolution/ DC-HSDPA	GSM/GPRS/EGPRS	TD-SCDMA/TD-HSPA	WLAN
LTE FDD/TDD	<b>√</b> *1,*2	✓	✓	✓	<b>√</b> *3
W-CDMA/HSPA/HSPA Evolution/DC-HSDPA	✓	✓	✓	_	<b>√</b> *3

UE Category	Cat.4, Cat.6	Cat.4, Cat.6, Cat.9, Cat.11, Cat.16, Cat.18, Cat.19		

<sup>★:</sup> Two MD8475A units are required.

### **SIM Connectivity Test**

Dual SIM Dual Standby (DSDS) and Dual SIM Dual Active (DSDA) tests of dual-SIM UE can be performed using two sets of MD8475A/MD8475B. Additionally, Single SIM Dual Standby (SSDS) and Single SIM Dual Active (SSDA) of single-SIM UE can be performed using one MD8475A/MD8475B. These test environments can be fully automated using SmartStudio Manager.

### **Test Example:**

The power consumption and throughput of a dual-SIM UE can be confirmed while the UE is making a voice call using SIM1 and transferring packet data using SIM2.

### Simple Throughput Test Environment (MD8475B)

### Throughput testing until now

- It needs to be adjusted for each application about radio layer settings and server settings.
- Performance depends on the PC specification and the load of Ethernet.

### Throughput testing using MD8475B

- Single GUI supports to adjust for each application about radio layer settings and server settings.
- Performance is independent from PC specification and the load of Ethernet.

For the transmission and reception of the UE, use iPerf application which is widely used for throughput testing.

### **Data Packet Communications**

Data packet communication environments are complex, but SmartStudio makes it easy to resolve troublesome packet bottlenecks, shortening evaluation times.

### **Versatile Server Environment**

Because the MD8475A/MD8475B pre-installs Windows 7, commercial application servers can be easily installed.

### **Status Evaluation**

A full line of function tools can be used to check communication status, including throughput, ACK/NACK counts, and RF monitoring. Simultaneous checking of multiple layers allows quick troubleshooting during data communications.

### **Genuine Application Test Environment**

Connecting the MD8475A/MD8475B to the Internet supports Web application tests using UEs under development to verify actual in-use power consumption and throughput before market release.

### **Voice Call Evaluation Environment**

The need for voice-call evaluations has not changed even with the spread of LTE services. However, some voice-call test items, such as the access barred condition and emergency calls, are not easily evaluated on live networks. SmartStudio supports comprehensive evaluation of UE under high-load conditions, such as testing of simultaneous voice calls and other functions.

### 3G/2G Voice Calling Test

Just making voice settings using SmartStudio is all that is necessary for voice tests with the MD8475A/MD8475B.

#### Multimedia Interface Software MX847508B

### **Setting Roaming and Registering Address Book**

When performing incoming-call tests of W-CDMA/GSM UE, SmartStudio can display any of 'Public', 'National', 'International', and 'Unknown' on the UE. Additionally, when the incoming call number matches a preregistered number in the address book, the name associated with the number is displayed.

### **Setting Identify Type**

When performing incoming call tests of W-CDMA/GSM UEs, either IMSI or TMSI can be chosen for the UE Caller ID using Paging.

### Voice Call Evaluation Environment

### **Voice over LTE Tests**

Since LTE uses the data network, Voice over LTE (VoLTE) communications also use the data network; SmartStudio simplifies VoLTE tests.

### Loopback Tests of VoLTE/Video

The SmartStudio CSCF function supports VoLTE tests (AMR/W-AMR Codec, etc.) in the loopback mode.

In addition to an IMS server, VoLTE tests require a variety of LTE settings about multi-PDN. Not only does SmartStudio support multi-PDN\*1, but it it also supports packet filter and QoS settings. Additionally, loopback audio data can be changed using the RTP function.

At VoLTE loopback testing, as well as looping voice data sent to the terminal from the network back from the terminal, the voice data can be changed to the MUTE status or to a fixed pattern to perform communications quality tests and battery consumption measurements requiring good reproducibility.\*2

- ★1: GSM and TD-SCDMA are not supported.
- ★2: Requires MX847570A-086 or MX847570B-086.
- \*3: RoHC settings require the MX847550A-060 or MX847550B-060 option. The RTP/VDP/IP (0x0001) and UDP/IP RoHC (0x0002) profiles are supported.

#### End-to-End Tests of VoLTE and Video Call

Voice over LTE can be tested between two LTE UEs in both directions using two MD8475A units to benchmark and evaluate calls between actual UEs.

### **Voice Call Evaluation Environment**

### Testing Voice Calls from LTE to 3G/2G

A variety of technologies are used when a UE moves between systems from an LTE to 3G/2G cell. Configuring a 2-cell test environment using SmartStudio supports LTE and 2G/3G system voice call tests such as CS Fallback and SV-LTE (Simultaneous Voice and LTE).

③ Connect voice call by CS

- ① LTE: Calling over VoLTE
- ② Transfer 3G/2G information from base station before moving between systems
- ③ Continue voice call without interruption

### **SMS Tests**

SMS and MMS are popular messaging services used worldwide. Exchanges between UEs as well as the number of verification items are both increasing because more direct control of UE is being attempted now.

### Sending/Receiving SMS Text Messages

SmartStudio has a dedicated SMS server supporting sending and receiving of SMS messages at any PS or CS network setting. Multiple SMS messages can be preregistered for continuous sending and CBS messages can be sent too.

### **Sending Binary SMS**

The MD8475A/MD8475B can send binary messages as SMS supporting remote control of the UE. Additionally, general evaluations, such as behavior when receiving an SMS during a voice call, can be evaluated to help prevent problems occurring in the field.

### **IMS Service Tests**

SmartStudio has a built-in standard server environment for running IMS server functions for easy service tests, including VoLTE, SMS over IMS, etc.

### SIP Registration of a Non-IMS UE

- PS Attach: Connect to Data server.
- → Get address using DNS, etc.
- → det address dsirig D
- 2. SIP Regist:
  - → Depends on application.
- ⇒ One PDN is required.

#### **Standard IMS Server Function**

### **CSCF (Call Session Control Function)**

Supports standard server function for VoLTE and SMS over IMS tests as well as voice data loopback function. IPsec is supported too.

#### DHCPv6 (Dynamic Host Configuration Protocol v6)

Allocates IPv6 address and notifies DNS/SIP server address to network node.

### **DNS (Domain Name Server)**

Operates as DNS cache server.

### NDP (Neighbor Discovery Protocol)

Supports function to transmit RA (Router Advertisement) and periodically transmit RA to RS (Router Solicitation).

#### NTP (Network Time Protocol)

The UE and MD8475A times are synchronized by sending time data in response to an NTP request.

### **PSAP (Public Safety Answering Point)**

The UA (User Agent) and voice data loopback function support PSAP simulation for running IMS Emergency tests.

#### XCAP (XML Configuration Access Protocol)

This function supports updating, referencing, and deleting of XML format file data (XCAP documents).

### SIP Registration of an IMS UE

### **Typical Connection Procedure**

- 1. IMS Regist: Connect to CSCF server using SIP.
- 2. Data Communication: Connect to Data server.
- ⇒ Consequently, two or more PDN required.

### **SMS over IMS Setting**

UE can register with CSCF server, and can transmit and receive SMS over IMS.

### **Ping Sending Function**

The Ping sending function is used to verify the connection of the device under test to the network.

### **IMS Options**

### Extended CSCF Option MX847570A-080/MX847570B-080

Various conditions can be set for VoLTE/Video quasi-normal and abnormal tests. Moreover, VoLTE call and hang-up sequences can both be confirmed from SmartStudio. In addition, VoLTE/Video audio codec switchover tests are supported as well.

### Virtual UA Calling/Release

VoLTE calling from the SmartStudio simulated UE (Virtual UA) is supported. In addition, any Virtual UA response can be set.

#### **Network Fault**

The occurrence of a server or network fault can be created.

MD8475B

### **Message Blocking**

Ignore and Reply responses to specific messages can be changed arbitrarily.

### **Multi-P-CSCF Settings**

Up to three types of P-CDCF addresses can be notified to UE by one PDN to confirm correct UE operation for multiple addresses.

### **Voice Codec Switchover**

Any codec can be sent from the MD8475A/MD8475B to the UE, and switchover tests, such as VoLTE  $\rightarrow$  Video, are supported too.

## IMS Supplementary Service Option MX847570A-081/MX847570B-081

This option adds functions for simulating VoLTE/Video caller ID, call transfer and call hold. Various CSCF and XCAP service settings as well as supplementary service functions can be set.

### **Caller ID Display ON/OFF Function**

MD8475B

### **Forwarding Function**

MD8475B

### Call Hold/Resume Function

Both test UE and Virtual UA hold operations can be verified. In addition, the call can be resumed by pressing the Resume button.

MD8475B

### **VoLTE Conference Test**

The 3GPP TS 24.605 defined VoLTE Conference Call functions can be tested.

	3GPP TS 24.605
4.5.2.1.1	User joining a conference
4.5.2.1.2	User inviting another user to a conference
4.5.2.1.3	User leaving a conference
4.5.2.1.4	User creating a conference
4.5.2.1.5	Subscription for the conference event package
4.5.2.2.1	Conference focus
4.5.2.2.2	Conference notification service
4.5.2.7	Actions at the destination UE
4.6.1	Communication HOLD (HOLD)
4.6.3	Terminating Identification Restriction (TIR)
4.6.5	Originating Identification Restriction (OIR)

### **IMS Options**

### RCS Basic Option MX847570A-083/MX847570B-083

Rich Communication Suite (RCS) is the next evolutionary step in deploying existing simple voice and messaging (SMS, MMS) services on various networks and UEs with "rich" communications. Installing this software supports RCS defined tests of Instant Messaging (IM), Address Book, and Contents sharing.

Item	Note
Configuration & Registration	HTTP (S) based support
Capability Discovery	
Standalone Messaging	
1-to-1 Chat	
Group Chat	
File Transfer	
Content Sharing	
Social Presence Information	Geolocation service not supported
IP Voice Call	IR.92 based support Interaction with other RCS services not supported
IP Video Call (IR.94)	IR.94 based support

### **RCS Service Image**

### GBA Authentication Option MX847570A-084/MX847570B-084

The software option references the 3GPP GBA Authentication algorithm to simulate the authentication procedure required when connecting to the Internet via networks other than Home Networks.

### IMS Early Media Option MX847570A-085/MX847570B-085

The software option simulates the IMS Early Media sequence. It supports MRFC, MRFP, etc., nodes and can authenticate service functions such as customized ringtones from the network side.

## NRBT: Function for recovering RBT (ring back tone) from network rather than from UE

The recovery status (recovery possible/not possible/recovering/ stopped) for each session is displayed on the Information screen.

## Alert-Info: Provides substitute ring back tone using Alert-Info, one of the Early Media switching function

### **IMS Options**

### RTP Frame Control Option MX847570A-086/MX847570B-086

This software controls the media data (RTP packets) during VoLTE communications. In addition to the MUTE condition and Fixed pattern, the data itself can be delayed; it can be used to configure the static stage required at audio evaluation and battery consumption measurement.

# IMS Script Basic Option MX847570A-060/MX847570B-060 XCAP Script Option MX847570A-061/MX847570B-061

The software option can be used to edit and create SIP messages/ XCAP messages using a ladder sequence to simulate the CSCF server/XCAP server behavior. Not only can configure a test environment from the service designing specification stage, but also user-specific tests, such as quasi-normal and abnormal conditions, can also be tested to easily support every test requirement.

#### Property Field:

Network parameters such as IP address are set here.

### Scripting Field:

Sequence messages between the UE and CSCF are edited and executed here.

### IMS Log Import Option MX847570B-062

This software option enables importing Wireshark logs, and create IMS script automatically. This Script is editable using Add-in Sever window. This option help flexible evaluation of IMS.

### **IMS Options**

### IMS Options (MD8475A/MD8475B)

✓: Supported

### **New Services**

New network services are being deployed at an increasing rate, requiring more-and-more tests for UEs supporting such new services. The MD8475A/MD8475B makes it easy to support new mobile test environments.

### **WLAN Offload Tests**

Offloading data traffic to WLAN networks is being deployed as a technology for preventing traffic congestion on mobile networks. The MD8475A/MD8475B supports a WLAN data offload test environment.

### WLAN Offload Basic Option MX847570A-070/MX847570B-070

The software option provides functions for forwarding packets between the UE and networks with both Trusted non-3GPP Access and Untrusted non-3GPP Access authentication functions, as well as for monitoring packets graphically.

### ePDG Option MX847570A-071/MX847570B-071

The software option supports the IKEv2 key exchange procedure and IPsec communications functions for Untrusted non-3GPP Access network authentication.

#### ANDSF Option MX847570A-072/MX847570B-072

The software option supports the function for setting and distributing the system selection policy between 3GPP and WLAN (distributes Policy and Discovery Information according to request from UE, and receives Location and Profile reports from UE).

### Extended ePDG Option MX847570A-073/MX847570B-073

The software option supports configuration of an ePDG status fault test environment for inserting errors into the ePDG sequence, setting timeouts, etc. Additionally, this option can be used to support Fast Re-Authentication (EAP-SIM/EAP-AKA) tests without the need to generate UE-side authentication keys.

### Wi-Fi Calling Evaluation Environment

Wi-Fi Calling is a function for making voice calls and sending/ receiving SMS over WLAN. Using this function, voice calls can be made using the telephone number registered inside the SIM card. Combining the MD8475A/MD8475B with the WLAN option supports verification of Wi-Fi Calling voice calls as well as handover tests from VoLTE to Wi-Fi Calling and vice versa.

### **Power Consumption Test**

SmartStudio supports detailed settings such as changes to the UE RF output and stopping packet communications.

### **Base Station Settings**

Any messages, such as Paging Cycle, UL TPC, etc., can be sent to the  $\ensuremath{\mathsf{UE}}^\star$ .

Support W-CDMA CPC, Ec/lor, etc.

★: The settable items differ by the systems.

### **Packets Communication State (RRC State Change) Settings**

When packets stop passing over the network during data packet communications, the Cell Status can be transitioned at a specific timing to switch the UE to any RRC State. This is useful for configuring a test environment simulating a real network when testing battery life.

### **Check UE Tx RF Power**

### RF Measurement MX847506A Quick TRX Diagnosis MX847506B

Adding RF Measurement supports verification of UE Tx RF power. A UE power consumption test environment can be configured easily by combined use with SmartStudio base station settings from the UE. Further, BLER can be verified using graphical or tabulated data.

### **Power Consumption Test using SmartStudio Manager**

The MX847503A SmartStudio Manager software is bundled with test cases for measuring the UE power consumption. In addition, the MX847503A can also control peripheral devices simultaneously, shortening the time required for configuring UE test environments.

### **Flexible Base Station Settings**

Base station settings are essential for testing UE connections. Not only does SmartStudio support frequency band and Tx and Rx power settings, it can also be set to behave as a real base station.

### **Setting Base Station Parameters**

#### **Cell Parameter Settings**

Up to 32 base station parameters can be saved in one file to prevent setting errors and assure fast, smooth testing when making slight changes to frequency and bandwidth before retesting.

### 32 cells per system (Total 160 cells)

### At-a-Glance Confirmation of UE Performance

Moving the mouse cursor over the SmartStudio UE icon displays a summary of the UE capability information for easy confirmation of the categories, bands, etc., supported by the UE under test.

System	Information Element	Example
	Access Stratum Release	Rel.12
	UE Category	4, 6, 9
LTE	Supported Band	1, 2, 3, 4
	Band Combination	1A-2A, 3C
	Band Combination (Rel.11)	1A-2A, 3C
	Access Stratum Release	Rel.10
W-CDMA	HSDPA Category (Rel.7/Rel.8)	10 (14/24)
W-CDIVIA	HSUPA Category	6
	Supported Band	I, II
	Access Stratum Release	Rel.9
TD-SCDMA	HSDPA Category	15
TD-SCDIVIA	HSUPA Category	6
	Supported Band	a, f
	GPRS Multislot Class	12
GSM/GPRS	EGPRS Multislot Class	12
	Supported Band	GSM E

### **Base Station Power Settings**

The Tx/Rx power of the base station can be changed during testing to simulate Out-of-Service tests by stopping RF on Smartstudio.

### **Setting Neighbor Cells**

Neighbor cells can be set to display the mix of multiple cells for a UE graphically.

### **Creating Environment for Difficult Tests on Live Network**

Some UE tests cannot be run on a commercial live network and are difficult on a test network. SmartStudio makes it easy to support these tests.

### **Reject Tests**

### Attach Reject/Ignore

By setting specific messages, UE connection request can be rejected when the UE tries to connect the base station. In addition, the base station ignores messages from the UE by setting 'Ignore', enabling confirmation of the UE behavior when messages are ignored.

### **Barred Call and Emergency Call Tests**

### **Access Class Control**

Sometimes, carriers limit access at events where there are too many people trying to call at once or during abnormally busy times like New Year. SmartStudio can configure an access control test environment, which is difficult to do on a live network.

### **Emergency Call Test**

Obviously, emergency calls cannot be tested on a live network but this is an essential test that must be performed. SmartStudio offers emergency call test settings and execution.

System	Control Method	Operation
	Not Barred	No Access Control
W-CDMA/	Barred	Call barring for all communications
GSM	Emergency	Call barring for communications except emergency call

### **APN Reject**

By setting specific messages, UE connection request can be rejected when the UE connects to the network.

### **Emergency Alerts Tests**

Using the built-in SmartStudio PWS center function supports sending of emergency alerts like earthquake and tsunami warnings to the UE\*.

ETWS/CMAS messages can be sent at any timing simply by selecting created/edited messages.

- ETWS (Earthquake and Tsunami Warning System used in Japan)
- CMAS (Commercial Mobile Alert System) North American Federal and state government system for sending standard-format text and audio messages to TV broadcast stations
- ★: Supports LTE/W-CDMA/GSM.

### **Configuring eCall Compliance to Application Test Environments**

This solution makes it easy to configure an environment for emulating the eCall emergency rescue information system for automatically transmitting traffic accident information, including accident location, as well as for making voice calls to an emergency assistance Public Safety Answering Point (PSAP). Since emergency calls cannot be tested on live communications networks, combining the Signalling Tester MD8475A/B and eCall Tester MX703330E software is the perfect answer to testing IVS (In Vehicle System) communications functions.

#### eCall Tester MX703330E

The MX703330E emulates the eCall system IVS and PSAP communications sequence. It supports quasi-normal test of MSD timeout that are hard to simulate on a live network, as well as comparison of reference MSD (expected) and received data.

### **Features**

- EN16454-compliant
- Implements communications sequence tests between IVS and PSAP
- Trace-displays status of eCall communications (MSD-Voice) and MSD communications (in-band modem)
- Displays in-band modem sequence and MSD decode data (conversion to meaningful data) execution results and outputs as data file
- Sets reference MSD (expected values) and displays results of comparison with received MSD
- Simulates base station operation in eCall Tester background, making specialist mobile protocol knowledge unnecessary for eCall evaluation
- Performs external control of eCall tester using SmartStudio Manager automation tool to perform PSAP operations

### **EU eCall Compliance Test**

European Commission regulation (EU) 2017/79 approved sale of new M1 and N1 category in-vehicle eCall equipment from 31 March 2018. eCall is an emergency rescue information system for automatically transmitting traffic accident information, including accident location, as well as for making voice calls to an emergency assistance centre, or Public Safety Answering Point (PSAP). The eCall Tester with EN 16454 PSAP server function supports configuration of the type-certification test environment. Additionally, the interactive GUI simplifies parameter changes, while display of real-time MSD analysis data improves the efficiency of pre-compliance testing, including debugging.

★ M1 Category: Passenger vehicles with driver and 8 or less seats N1 Category: Trucks up to 3.5 tonnes max. load weight

### 

MSD Result (sequence and decode)
Save: MSD result save at XML file

### **eCall Application Testing**

Some IVS have requirements for both calling and Telematics functions while driving. Figure shows the handover between base stations during driving.

Figure shows the situation when the IVS switches from a 4G network connection used by Telematics services during driving to a 2G/3G network connection for eCall functions when an accident occurs. To emulate this type of test environment, the MD8475A and eCall Tester software perform the handover and CS Fallback switching tests in combination with the eCall function test.

Requires Multi-Cell Option MX703330E-061.

One-touch handover test settings save time and eliminate user worries. The following cells are supported.

	LTE	W-CDMA	GSM
LTE*	_	✓	✓
W-CDMA	✓	✓	✓
GSM	✓	✓	✓

★: VoLTE not supported

These tests help to greatly improve IVS quality and reliability.

### eSIM OTA Verification Solution eUICC Profile Manager Z2002A

MD8475A with COMPRION's software eUICC Profile Manager can performing eSIM (Embedded SIM) test. eSIM allows the communication protocol information on a SIM to be changed via an OTA (Over the Air) environment.

### **Sequence Flow**

Z2002A include following Software and USB dongle 1pc made by COMPRION.

Model No.	Model name	Quantity
31000111	eUICC Profile Manager	1
31000204	Network Simulation Control Connection Package Anritsu MD8475A	
31000134	Network Simulation Control Connection	1
31000057	SMSC Simulation	1
31000205	Anritsu MD8475A Signaling Control	
31000113	Profile Explorer	1
31000114	Profile Loader M2M	1
#3100 0171	Dongle	1

### **Signalling Tester MD8475A/MD8475B Automation Functions**

### **Regression Tests Necessity**

Verification of existing functions and regression testing are key elements of software update testing during UE development. Automated and repeated testing of known items to confirm the absence of new software bugs plays a major role in improving development efficiency and cutting costs.

### Automated Testing with SmartStudio: SmartStudio Manager MX847503A

The SmartStudio Manager MX847503A software is for editing test sequences and running created test sequences automatically and continuously. This software automates manual testing using the SmartStudio MX847570A software. Automated, unmanned operation test improves efficiency. Additionally, Pass/Fail results can be reported along with the continuous test.

### **Test Sequence Editing Screen**

### **Test Sequence Continuous Execution Screen**

### **Test Sequence Continuous Execution Results Display**

### **Signalling Tester MD8475A/MD8475B Automation Functions**

### **Regression Tests Necessity**

# UE Operation Auto-Recording/Auto-Executing: Smartphone Control Platform MX847504A

The MX847504A software option can records Android OS smartphone operations and offers an environment for creating, editing and running UE automated control scripts. Regression and stable operation confirmation testing of UE are easy using the intuitive editing environment with pre-installed scripts and GUI.

Android™ is a trademark of Google Inc.

### **Regression Tests and Test Sequences**

SmartStudio Manager has various test sequences over 180. These test sequences can be used to confirm basic UE operations, such as making and answering voice calls and SMS messages, as well as measuring throughput. Users can use the AT command interface and Smartphone Control Platform MX847504A to control the UE remotely and perform continuous testing without hands-on UE operation.

### **Test Sequences (extract)**

### Signalling Tester MD8475A

### Signalling Tester MD8475A System Configurations/Option/Software

### **Main Frame Options**

### 2nd RF MD8475A-001

This option is required for tests using two RF signals, such as 2-cell and MIMO tests.

### Multi-cell Software MX847502A

This option is required when simultaneously activating two cells such as at handover tests within the same system, Inter-RAT tests between different systems, LTE Carrier Aggregation tests, etc.

### **RF Measurement MX847506A**

Installing combinations of the MX847510A, MX847520A, and MX847550A software options supports extended RF Tx power accuracy, RF Rx power, and BLER measurements for each system.

### Multimedia Interface Software MX847508A

This software is required for end-to-end voice tests between microphones and speakers (headsets) connected to the MD8475A and the mobile equipment. The W-CDMA and GSM AMR-NB (AMR Narrowband), GSM EFR (Enhanced Full Rate Speech), FR (Full Rate Speech), and HR (Half Rate Speech) codec can be used.

#### AMR-WB MX847508A-001

This option supports the W-CDMA AMR-WB (AMR Wideband) codecs. The MX847508A is required.

### Supported voice codec list

Supported Codecs	Multimedia Interface Software MX847508A	AMR-WB MX847508A-001
AMR-NB (W-CDMA/GSM)	✓	_
GSM-EFR (GSM)	✓	_
GSM-FR (GSM)	✓	_
GSM-HR (GSM)	✓	_
AMR-WB (W-CDMA)	_	✓

### SmartStudio MX847570A

This software supports the user interface for scenario-less testing In addition to offering functions such as sending and receiving SMS messages, sending and receiving ETWS/CMAS messages, making and receiving voice calls, and sending and receiving data packets, it also supports CSCF server functions required for IMS service tests.

### **Automation Tool**

### SmartStudio Manager MX847503A

This option increases the efficiency of evaluations by automating manual tests performed by the MX847570A SmartStudio software. In addition, the package includes test sequences required for evaluating basic functions.

### eCall Tester Control Library MX847503A-923

This library option is for remote control of tests using the MX703330E eCall tester. Test automation without manual operation increases test efficiency.

#### Smartphone Control Platform MX847504A

Recorded via ADB and UE automated control scripts can be created, edited and run. As well as supporting automated control from the MX847503A, two-way automatic control of the measuring instrument and UE supports an operator-free test environment for higher test efficiency.

#### W-CDMA

Basic Configuration (Voice/Video/Packet)
 Multi-signalling Unit MD8475A-070
 W-CDMA Simulation Software MX847510A
 W-CDMA Option MX847570A-010

These are for basic W-CDMA configuration. These tests support voice, videophone, packet, and SMS tests.

### Options

### **HSPA Option MX847510A-001**

This option supports HSPA UE categories defined by the 3GPP Release 5/Release 6 standards.

# HSPA Evolution/DC-HSDPA Option MX847510A-011 HSPA Evolution/DC-HSDPA Option MX847570A-011

These options support HSPA Evolution and DC-HSPA packet communications tests for high-speed packet services used by W-CDMA systems.

#### Options

### LTE 2×2 MIMO Option MX847550A-020

This option adds  $2\times2$  MIMO to the MX847550A. Supported LTE  $2\times2$  MIMO Functions.\*

### LTE Carrier Aggregation Option MX847550A-040

This software options supports LTE 2CC Carrier Aggregation. It supports the 2CC SISO test environment. Additionally, installing the MX847550A-020 software supports the 2CC MIMO test environment.

#### Fading IO Option MD8475A-003

This hardware option is required for connecting two MD8475A sets or the combination of one MD8475A and one MD8430A. In addition, combining one MD8475A and one MF6900A Fading Simulator supports configuration of LTE FDD Fading test environment.

### LTE RoHC Option MX847550A-060

This option adds better compression algorithms to improve LTE IP packet transfer efficiency.

### **Supported Profiles**

IP	Profile
0x0000	No compression (LTE)/Uncompressed (UMTS)
0x0001	RTP/UDP/IP
0x0002	UDP/IP

#### Support Service

### MX847550A 1Year Support Service MX847550A-SS110

This service contract offers customers 1 year of support for technical enquiries as well as updates to the latest software versions adding extra functionality and bug fixes via downloads from the web page.

★: Handover tests not supported when testing 2×2 MIMO.

### **Signalling Tester MD8475A**

### Signalling Tester MD8475A System Configurations/Option/Software

### **GSM**

### Basic Configuration

GSM Signalling Unit MD8475A-020 GSM/GPRS Simulation Software MX847520A GSM Option MX847570A-020

This is the basic configuration for performing GSM/GPRS tests. It supports voice and packet communications tests, SMS sending and receiving, etc.

#### Options

#### EGPRS Option MX847520A-001

This option supports EGPRS evaluation — a GPRS high-speed, data communication method. Application tests using EGPRS communications are supported.

### Supported EGPRS Specifications

1 1	Frequency Bandwidth	850, 900, 1800, 1900 MHz	
	Modulation &	MCS 1, 2, 3, 4 (GMSK)	
	Coding Scheme	MCS 5, 6, 7, 8, 9 (8PSK)	
Layer 1	Number of Slots	Up to Multi Slot Class 12	
	Number of Siots	(DL: 4/UL: 4/SUM: 5)	
	Channel Combination	Combination 11 & 13	
	Broadcasting	BCCH/CCCH, PBCCH/PCCH	
Lavora	Control Channel	Beeri/eeeri, FBeeri/Feeri	
Layer 2, 3	ARQ Type	Type 1	
	Window Size	64 to 192	
Standard		3GPP Release 99	

### Support Service

#### MX847520A 1Year Support Service MX847520A-SS110

This service contract offers customers 1 year of support for technical enquiries as well as updates to the latest software versions adding extra functionality and bug fixes via downloads from the web page.

### **TD-SCDMA**

### Basic Configuration

TD-SCDMA Signalling Unit MD8475A-040 TD-SCDMA Simulation Software MX847540A TD-SCDMA Option MX847570A-040

These are for basic TD-SCDMA configuration which support voice, videophone, packet, and SMS tests.

#### Options

### TD-HSPA Option MX847540A-001

This is for evaluating all 3GPP TS 25.306 HSPA UE categories\*1.

### 3GPP TS 25.306

#### TD-HSDPA

HS-DSCH category	Maximum number of HSDSCH codes per timeslot	Maximum number of HSDSCH timeslots per TTI	Maximum number of HSDSCH transport channel bits can be received within an HSDSCH TTI	Total number of soft channel bits	Maximum Throughput [bps]
Category 1 to 3	16	2	2788	11264	557600
Category 4 to 6	16	2	5600	22528	1120000
Category 7 to 9	16	3	8416	33792	1688200
Category 10 to 12	16	4	11226	45056	2245200
Category 13 to 15	16	5	14043	56320	2808600

### TD-HSUPA

E-DCH category	Maximum number of E-DCH timeslots per TTI	Maximum number of E-DCH transport channel bits that can be received within an E-DCH TTI	Maximum Throughput [bps]
Category 1	2*2	2754	550800
Category 2	3*2	4162	832400
Category 3	2*2	5532	1106400
Category 4	3*2	8348	1669600
Category 5	4*2	11160	2232000
Category 6	5* <sup>2</sup>	11160	2232000

**<sup>★</sup>**1: MX847570A supports Category 6 only.

### Support Service

### MX847540A 1Year Support Service MX847540A-SS110

This service contract offers customers 1 year of support for technical enquiries as well as updates to the latest software versions adding extra functionality and bug fixes via downloads from the web page.

 $<sup>\</sup>star$ 2: One timeslot supports two physical channels when 16QAM not used.

## Signalling Tester MD8475A System Configurations/Option/Software

## **IMS Options**

#### IMS Script Basic Option MX847570A-060

This software supports scripting of the communication procedure between the test UE and CSCF server using a ladder sequence to provide a very flexible and expandable test environment.

#### XCAP Script Option MX847570A-061

This option provides a test environment with high flexibility and expandability for creating scripts using a ladder sequence to edit XCAP messages between the UE and server without the need to prepare an actual server.

## Extended CSCF Option MX847570A-080

This software option adds functions for calling from the network to the UE as well as extended functions for CSCF-server-side network congestion and no response status.

## IMS Supplementary Service Option MX847570A-081

This software option adds other service tests, including VoLTE caller ID display, call forwarding, call holding, etc.

## RCS Basic Option MX847570A-083

This software option simulates RCS services. It is used to perform tests including RCS Configuration, Registration, Instant Messaging, etc.

## **GBA Authentication Option MX847570A-084**

This option has the 3GPP GBA Authentication algorithm, authentication procedure and parameter settings for simulating GBA operations.

## IMS Early Media Option MX847570A-085

This software supports IMS Early Media sequence tests. It can be used to confirm customized call tone services at the network side, such as NRBT (Network Ring Back Tone) and CAT (Customized Alerting Tone).

## RTP Frame Control Option MX847570A-086

This option is for controlling media data (RTP packets) during VoLTE communications. It can be used to configure a voice environment in the MUTE status and with fixed data; a measurement environment can be configured for abnormal audio quality verification and battery power consumption tests in a fixed state.

## Support Service

## MX847570A-060 1-Year Technical Support Service MX847570A-TS160

This contract offers customers support for technical enquiries for 1 year.

## MX847570A-061 1-Year Technical Support Service MX847570A-TS161

This contract offers customers support for technical enquiries for 1 year.

## **WLAN Offload Options**

#### WLAN Offload Basic Option MX847570A-070

This software option provides an EAP authentication server for performing EAP over RADIUS communications (EAP-SIM/EAP-AKA) between a WLAN access point and the EAP authentication server. Additionally, data access by the physical bearers is displayed to verify the 3GPP/WLAN switchover.

## ePDG Option MX847570A-071

This software option provides an ePDG server for testing the UE functions at Untrusted non-3GPP Access by running IKEv2 key exchanges and IPsec communications between the UE and ePDG. It requires the MX847570A-070 option as well.

## ANDSF Option MX847570A-072

This software option provides the ANDSF function for testing the UE functions after ANDSF policy distribution to the UE. It requires the MX847570A-070 options as well.

#### Extended ePDG Option MX847570A-073

This software option supports configuration of an ePDG status fault test environment for inserting errors into the ePDG sequence, setting timeouts, etc. Additionally, this option can be used to support Fast Re-Authentication (EAP-SIM/EAP-AKA) tests without the need to generate UE-side authentication keys. It requires the MX847570A-070/MX847570A-071.

## Signalling Tester MD8475A System Configurations/Option/Software

## eCall Options

## eCall Tester (Perpetual License) MX703330E-PL010

This option simulates the PSAP used by eCall services to support the eCall sequence (MSD call  $\rightarrow$  Voice call) between the IVS and PSAP at a road accident.

The following test standards are supported:

- TS 26 .267 V8.6.0 (2011-03)
- TS 26 .268 V8.6.0 (2011-03)
- EN15722: 2015
- EN16062: 2015
- EN16454: 2015
- · ISO3779: 2009

This option can be used as a test environment for model authentication in accordance with the EN16454 recommendations. This option provides audio replay and record functions.

## MSD ERA GLONASS Option MX703330E-031

This option supports the MSD data communications function over SMS used by the ERA-GLONASS system

The following test standards are supported:

- GOST R 54619-2011
- GOST R 54620-2011
- GOST R 54721-2011
- GOST R 55530-2013

## EGTS Server ERA GLONASS Option MX703330E-032

This option provides a test environment to send/receive and encode/decode EGTS messages defined in the GOST R 54619/54620. MX703330E-031 is separately required.

## NG112 LTE eCall Option MX703330E-041

This option provides functional tests for MSD data communication and voice call over IMS defined in the RFC8147 standard.

## Multi-Cell Option MX703330E-061

This option provides the handover test environment required when setting two or more cells as well as the CS Fallback test environment at the eCall environment. Practical eCall module tests are supported using this option.

The cell combinations are as follows:

	LTE	W-CDMA	GSM
LTE*	_	✓	✓
W-CDMA	✓	✓	✓
GSM	✓	✓	✓

<sup>★:</sup> VoLTE is not supported

## Support Service

## MX703330E 1-Year Support Service MX703330E-SS110

This service contract offers customers 1 year of support for technical enquiries as well as updates to the latest software versions adding extra functionality and bug fixes via downloads from the web page.

## SSM Test PKG European eCall MX847503A-601

This test package provides automated test environment. Opening the test case on the SSM, it shows test procedures of test items defined in the (EC) 2017/79 and EN16454, and automatically configures the setting of MD8475A/MD8475B and eCall tester. This test package also has report functions for each standards.

## SSM Test PKG GOST 33467 MX847503A-701

This test package provides automated test environment. Opening the test case on the SSM, it shows test procedures of test items defined in the GOST33457, and automatically configures the setting of MD8475A/MD8475B and eCall tester.

This test package also has report functions for each standards.

## **Scenario Tools**

## SIDE Software MX847580A SIP Option MX847580A-018

These software are for executing scenarios created using the MX843080A Scenario Integrated Development Environment in combination with the MX847510A, MX847520A, and MX847550A software.

## **Ciphering Option**

## W-CDMA Ciphering Option MX847510A-050

This option adds the W-CDMA ciphering function\*1, \*2 and supports for KASUMI (3GPP-recommended algorithm).

## GSM/GPRS Ciphering Option MX847520A-050

This option adds the GSM/GPRS ciphering function\*1,\*2 and supports both the GSM A5/1, A5/2, and A5/3 ciphering algorithms as well as the GPRS GEA/1, GEA/2, and GEA/3 ciphering algorithms.

## TD-SCDMA Ciphering Option MX847540A-050

This option adds the TD-SCDMA ciphering function\*1, \*2 and supports SNOW 3G (3GPP-recommended algorithm).

## LTE Ciphering Option MX847550A-050

This option adds the LTE ciphering function\*1,\*2 and supports SNOW 3G (3GPP-recommended algorithm) and AES.

- ★1: Does not work with MX847570A.
- $\star$ 2: The Integrity Algorithm does not require this option.

# Signalling Tester MD8475A

Model/Order No.	Name
	Application parts
41KC-3	Fixed Attenuator 3 dB
B0655A	Rack Mount Kit
J0004	Coaxial Adaptor (N (male)-SMA (female))
J0127A	Coaxial Cord, 1.0 m (BNC-P · RG58A/U · BNC-P)
J0127B	Coaxial Cord, 2.0 m (BNC-P · RG58A/U · BNC-P)
J0576B	Coaxial Cord, 1.0 m (N-P · 5D-2W · N-P)
J0576D	Coaxial Cord, 2.0 m (N-P · 5D-2W · N-P)
J0658	Adapter (SMA male-female L-type)
J1262A	RS-232C Cable (Straight 2 m, male-female)
J1262B	RS-232C Cable (Crossover 2 m, male-female)
J1263	W-CDMA Interface Cable (UE connection cable)
J1287	HDD-SUB15P Cable (milli-inch, for connecting MN8110B
J1333A	HDD-SUB15P Crossover Cable (inch)
J1416A	LVDS Cable
J1440A	LAN Cable
J1524A	Dsub15-BNC Conversion Cable
J1549A	LTE-C2K Sync Cable
J1605A	MD8475A 3GPP Sync Cable
J1609A	Signal Divider
J1610A	MD8475A 2CC MIMO Connect Cable Kit
J1651A	MD8475A Sync In Cable (for 3CC Test)
J1674A	SMA/P-SMA/P Soft Rigid Cable
J1674E	SMA/P-SMA/P Soft Rigid Cable (5 pcs)
J1674K	SMA/P-SMA/P Soft Rigid Cable (10 pcs)
MN8150A	RF Combiner Unit
P0035B	W-CDMA/GSM Test USIM (Standard UICC Size)
P0035B7	W-CDMA/GSM Test USIM (Micro UICC Size)
P0135A6	Anritsu Test UICC GA (nano UICC Size)
P0135A7	Anritsu Test UICC GA (Micro UICC Size)
P0135B6	Anritsu Test UICC GA (nano UICC Size)
P0135B7	Anritsu Test UICC GA (Micro UICC Size)
P0250A6	Anritsu Test UICC GT (nano UICC Size)
P0250A7	Anritsu Test UICC GT (Micro UICC Size)
P0250B6	Anritsu Test UICC GT (nano UICC Size)
P0250B7	Anritsu Test UICC GT (Micro UICC Size)
P0260A6	Anritsu Test UICC GM (nano UICC Size)
P0260A7	Anritsu Test UICC GM (Micro UICC Size)
P0260B6	Anritsu Test UICC GM (nano UICC Size)
P0260B7	Anritsu Test UICC GM (Micro UICC Size)
Z0749	MN8110B + Inch Screw Cable (for call processing I/O)
Z1908D	Standard Laptop for SSM
Z1919B	Standard Desktop for WLAN
Z2002A	eUICC Profile Manager

# **Signalling Tester MD8475B SmartStudio Test Functions**

✓: Supported

Function	Description			475 B	
Function	Description	LTE	W-CDMA*2	GSM*2	TD-SCI
neral					
Position Registration*1	Connects UE and creates test environment	✓	✓	✓	· ·
L1/L2 Counter	Counts values for each L1/L2 channel every second	✓	<b>√</b>	_	,
Throughput Counter	Simultaneously displays PHY layer and IP Throughput (SDU)	<b>√</b>	<b>/</b>	/	١,
Trace	Displays events for each layer as arrows		·	1	١.
		<b>→</b>	<b>✓</b>	<b>✓</b>	
Reject	Returns arbitrary reject message when UE connected				_
Neighbor Cell Setting	Reports information to UE about BTS adjacent to BTS under test	✓	✓	✓	
RF Related					
TRx Power Setting	Changes TRx power of BTS during Idle Communication	✓	✓	✓	
No Network Setting	Sets BTS Power output to OFF and switches UE to no network status	✓	<b>√</b>	<b>√</b>	
RF Monitor	Displays frequency, frequency error, and power for each channel such as PDSCH, PUSCH, etc.	✓	<b>✓</b>	1	
		· ·	· /	· /	
TPC Setting	Changes TPC (Transmit Power Control) arbitrarily		1		
AWGN	Sends AWGN in conjunction with normal signal	✓	✓	_	
RF Measurement Options	Measures UE RF power at each second	✓	✓	✓	
xternal Control					
Ethernet	Controls SmartStudio operation (parameter selection, start, etc.) from external PC	✓	<b>√</b>	<b>✓</b>	Т
			· /	· /	1
GPIB	Controls SmartStudio setting parameters from external PC	· ·			
re/Video Communications					
TE FDD/TDD					
VoLTE/Video Telephony Calling/Answering (Loopback)	Executes call test for UE supporting Voice over LTE/Video over LTE	✓			
Emergency Call/Originating System	Sets emergency call, and VoLTE/Video call control at LTE				
Codec Change	Changes audio and video codecs arbitrarily and executes UE switchover test	✓			
TE FDD/TDD, W-CDMA, GSM, TD-SCDMA					
CCED/cCCED*3	Auto-switches communication method when other system voice call received during	<b>√</b>	<b>✓</b>		
CSFB/eCSFB* <sup>3</sup>	LTE call	✓	· ·	<b>✓</b>	
SRVCC*3	Performs seamless switch to CS voice call during VoLTE call	<b>√</b>	<b>✓</b>	<b>✓</b>	$\vdash$
<u> </u>	r critimis scarniess switch to CS voice can during volite can	•		_ ,	
V-CDMA, GSM, TD-SCDMA	1				
Voice Call/Answer/On-hook (Loopback/Echoback)	Performs loopback call test*4		✓	✓	
Voice Call/Answer/On-hook (Handset)	Performs call test using headset		✓	✓	1
Emergency Call/Originating	Performs emergency call test with and without Test SIM		<b>✓</b>	<b>✓</b>	
zmergency cam originating	Sets Caller ID notification/non-notification/notification disabled/public phone/				
Caller ID Setting			✓	✓	
	international call answer				
Call Blocking (Release99) <barred></barred>	Sets call conditions for Release99 for W-CDMA, GSM, TD-SCDMA and bars all calls		✓	✓	
Call Blocking (Release99) <emergency></emergency>	Sets call conditions for Release99 for W-CDMA, GSM, TD-SCDMA and bars all calls		_	<b> </b>	
Call blocking (Releasess) \Enlergency>	except emergency calls		ľ	, v	
V-CDMA, TD-SCDMA					
	Device was loop back sell toot*4		<b>/</b>		
Videophone Call/Answer/On-hook (Loopback)	Performs loopback call test*4				_
ket Data Communications					
				_	
	Performs data TRx using IPv4	✓	✓	✓	
Pv4 Packet Test		<b>√</b>	✓ ✓	<b>V</b>	
Pv4 Packet Test Pv6 Packet Test	Performs data TRx using IPv6	✓	<b>√</b>	✓	
Pv4 Packet Test Pv6 Packet Test Packet Preservation/Dormant Test	Performs data TRx using IPv6 Releases RRC Connection while preserving PDP Context	√ √	✓ ✓	✓ -	
Pv4 Packet Test Pv6 Packet Test Packet Preservation/Dormant Test Multiple PDP Context/PDN Connect	Performs data TRx using IPv6 Releases RRC Connection while preserving PDP Context Connects multiple PDN and performs multisession packet data test	✓ ✓ ✓	✓ ✓ ✓	- -	
Pv4 Packet Test Pv6 Packet Test Packet Preservation/Dormant Test Multiple PDP Context/PDN Connect	Performs data TRx using IPv6 Releases RRC Connection while preserving PDP Context Connects multiple PDN and performs multisession packet data test Changes state from BTS during packet data communications	√ √	✓ ✓	✓ -	
Pv4 Packet Test Pv6 Packet Test Packet Preservation/Dormant Test Multiple PDP Context/PDN Connect State Change	Performs data TRx using IPv6 Releases RRC Connection while preserving PDP Context Connects multiple PDN and performs multisession packet data test	√ √ √	✓ ✓ ✓	- - -	
Pv4 Packet Test Pv6 Packet Test Packet Preservation/Dormant Test Multiple PDP Context/PDN Connect State Change	Performs data TRx using IPv6 Releases RRC Connection while preserving PDP Context Connects multiple PDN and performs multisession packet data test Changes state from BTS during packet data communications Uses built-in packet generator to implement simple measurement system with	✓ ✓ ✓	✓ ✓ ✓	- -	
Pv4 Packet Test Pv6 Packet Test Packet Preservation/Dormant Test Aultiple PDP Context/PDN Connect State Change P Data Traffic Functions	Performs data TRx using IPv6 Releases RRC Connection while preserving PDP Context Connects multiple PDN and performs multisession packet data test Changes state from BTS during packet data communications	√ √ √	✓ ✓ ✓	- - -	
Pv4 Packet Test Pv6 Packet Test Pv6 Packet Test Packet Preservation/Dormant Test Aultiple PDP Context/PDN Connect State Change P Data Traffic Functions TE FDD/TDD	Performs data TRx using IPv6 Releases RRC Connection while preserving PDP Context Connects multiple PDN and performs multisession packet data test Changes state from BTS during packet data communications Uses built-in packet generator to implement simple measurement system with	√ √ √ √	✓ ✓ ✓	- - -

## Signalling Tester MD8475B System Configurations/Option/Software

## **Main Frame Options**

## Extended RF MD8475B-002

This option is required to simulate the operation of three or more base-station cells. It supports 8Tx/4RX using the MD8475B.

#### Fading IO Option MD8475B-004

Combining the Signalling Tester MD8430A with the fading option and the MD8475B supports configuration of a fading test environment.

## IP Extension Option MD8475B-005

This option enables FTP throughput testing with multiple external servers.

## Multi-cell Software MX847502B

This option is required when simultaneously activating two or more cells such as at handover tests within the same system, Inter-RAT tests between different systems, LTE Carrier Aggregation tests, etc.

#### Multimedia Interface Software MX847508B

This option is required when performing end-to-end voice tests with microphones and speakers (headset) connected to the MD8475B. It can be used for W-CDMA and GSM AMR-NB (AMR Narrowband), GSM EFR (Enhanced Full Rate Speech), FR (Full Rate Speech), and HR (Half Rate Speech) codecs.

#### AMR-WB MX847508B-001

This option supports the W-CDMA AMR-WB (AMR Wideband) codec. It requires the MX847508B.

#### Supported voice codec list

Supported Codecs	Multimedia Interface Software MX847508B	AMR-WB MX847508B-001
AMR-NB (W-CDMA/GSM)	✓	_
GSM-EFR (GSM)	✓	_
GSM-FR (GSM)	✓	_
GSM-HR (GSM)	✓	_
AMR-WB (W-CDMA)	_	✓

## SmartStudio MX847570B

This software supports the user interface for scenario-less testing. In addition to offering functions such as sending and receiving SMS messages, sending and receiving ETWS/CMAS messages, making and receiving voice calls, and sending and receiving data packets, it also supports CSCF server functions required for IMS service tests.

## Support Service

## MX847570B 1Year Support Service MX847570B-SS110

This service contract offers customers 1 year of support for technical enquiries as well as updates to the latest software versions adding extra functionality and bug fixes via downloads from the web page.

#### W-CDMA

Basic Configuration (Voice/Video/Packet)

Multi-signalling Unit MD8475B-070 W-CDMA Simulation Software MX847510B W-CDMA Option MX847570B-010

These are for basic W-CDMA configuration. These tests support voice, videophone, packet, and SMS tests.

#### Options

HSPA Evolution/DC-HSDPA Option MX847510B-011 HSPA Evolution/DC-HSDPA Option MX847570B-011

These options support HSPA Evolution and DC-HSPA packet communications tests for high-speed packet services used by W-CDMA systems.

# Signalling Tester MD8475B System Configurations/Option/Software

## LTE

## Basic Configuration

Multi-signalling Unit MD8475B-070 Enhanced Multi-signalling Unit MD8475B-071 LTE Simulation Software MX847550B LTE Option MX847570B-050

These are for basic LTE FDD/TDD configuration. It supports both FDD and TDD technologies. These tests support confirmation of connections with LTE UEs during SISO, packet communications, and SMS sending/receiving. In addition, multi-cell tests are supported by installing the Multi-cell Software MX847502B.

<sup>★</sup> These UE Category tables show the case when MD8475B-071 is installed.

## Signalling Tester MD8475B System Configurations/Option/Software

#### Options

## LTE 2×2 MIMO Option MX847550B-020

This option adds 2×2 MIMO to the MX847550B.

## LTE 4×4 MIMO Option MX847550B-021

This option adds 4×4 MIMO to the MX847550B.

## LTE Licensed Assisted Access (LAA) Option MX847550B-030

This software option provides LTE Licensed Assisted Access (LAA) capability that can be used with the MIMO options and the Carrier Aggregation Options.

## LTE Carrier Aggregation Option MX847550B-040

This software option supports LTE 2CC Carrier Aggregation. It supports the 2CC SISO test environment. Additionally, installing the MX847550B-020 software supports the 2CC MIMO test environment.

## LTE Carrier Aggregation DL3CCs Option MX847550B-041

This software option supports LTE 3CC Carrier Aggregation. It supports the 3CC SISO test environment. Additionally, installing the MX847550B-020 software supports the 3CC MIMO test environment.

## LTE Carrier Aggregation DL4CCs Option MX847550B-042

This software option supports LTE 4CC Carrier Aggregation. It supports the 4CC SISO test environment. Additionally, installing the MX847550B-020 software supports the 4CC MIMO test environment.

## LTE Carrier Aggregation DL5CCs Option MX847550B-043

This software option supports LTE 5CC Carrier Aggregation. It supports the 5CC SISO test environment. Additionally, installing the MX847550B-020 software supports the 5CC MIMO test environment.

## LTE RoHC Option MX847550B-060

This option adds better compression algorithms to improve LTE IP packet transfer efficiency.

## Supported Profiles

IP	Profile
0x0000	No compression (LTE)/Uncompressed (UMTS)
0x0001	RTP/UDP/IP
0x0002	UDP/IP

## LTE 20 Layers Extension Option MX847550B-070

This option enables LTE 20 Layers (LTE 5CC, 4×4 MIMO) testing. If this option is not installed, LTE 16 Layers (4×4 MIMO for 3CCs and 2×2 MIMO for 2CCs out of LTE 5CCs) is maximum.

#### **GSM**

## Basic Configuration

GSM Signalling Unit MD8475B-020 GSM/GPRS Simulation Software MX847520B GSM Option MX847570B-020

This is the basic configuration for performing GSM/GPRS tests. It supports voice and packet communications tests, SMS sending and receiving, etc. Additionally, it can be used for evaluating application functions using EGPRS communications for EGPRS high-speed data communications.

## **Supported EGPRS Specifications**

Fraguesa Dandwidth	950 000 1900 1000 MHz
Frequency Bandwidth	850, 900, 1800, 1900 MHz
Modulation & Coding	MCS 1, 2, 3, 4 (GMSK)
Scheme	MCS 5, 6, 7, 8, 9 (8PSK)
Number of Class	Up to Multi Slot Class 12
Number of Slots	(DL: 4/UL: 4/SUM: 5)
Channel Combination	Combination 11 & 13
Broadcasting Control	Decitioned a procession
Channel	BCCH/CCCH, PBCCH/PCCH
ARQ Type	Type 1
Window Size	64 to 192
	3GPP Release 99
	Scheme Number of Slots Channel Combination Broadcasting Control Channel ARQ Type

## Signalling Tester MD8475B System Configurations/Option/Software

#### TD-SCDMA

#### Basic Configuration

TD-SCDMA Signalling Unit MD8475B-040 TD-SCDMA Simulation Software MX847540B TD-SCDMA Option MX847570B-040

These are for basic TD-SCDMA/TD-HSUPA\*1 configuration which support voice, videophone, packet, and SMS tests.

#### 3GPP TS 25.306

#### TD-HSDPA

HS-DSCH category	Maximum number of HSDSCH codes per timeslot	Maximum number of HSDSCH timeslots per TTI	Maximum number of HSDSCH transport channel bits can be received within an HSDSCH TTI	Total number of soft channel bits	Maximum Throughput [bps]
Category 1 to 3	16	2	2788	11264	557600
Category 4 to 6	16	2	5600	22528	1120000
Category 7 to 9	16	3	8416	33792	1688200
Category 10 to 12	16	4	11226	45056	2245200
Category 13 to 15	16	5	14043	56320	2808600

#### TD-HSUPA

E-DCH category	Maximum number of E-DCH timeslots per TTI	Maximum number of E-DCH transport channel bits that can be received within an E-DCH TTI	Maximum Throughput [bps]
Category 1	2*2	2754	550800
Category 2	3*2	4162	832400
Category 3	2*2	5532	1106400
Category 4	3* <sup>2</sup>	8348	1669600
Category 5	4*2	11160	2232000
Category 6	5* <sup>2</sup>	11160	2232000

<sup>★1:</sup> MX847570B supports Category 6 only.

## **IMS Options**

## IMS Script Basic Option MX847570B-060

This software supports scripting of the communication procedure between the test UE and CSCF server using a ladder sequence to provide a very flexible and expandable test environment.

#### XCAP Script Option MX847570B-061

This option provides a test environment with high flexibility and expandability for creating scripts using a ladder sequence to edit XCAP messages between the UE and server without the need to prepare an actual server.

## IMS Log Import Option MX847570B-062

This software option enables importing Wireshark logs, and create IMS script automatically. This Script is editable using Add-in Sever window. This option help flexible evaluation of IMS.

## Extended CSCF Option MX847570B-080

This software option adds functions for calling from the network to UE as well as extended functions for CSCF-server-side network congestion and no response status.

## IMS Supplementary Service Option MX847570B-081

This software option adds other service tests, including VoLTE caller ID display, call forwarding, call holding, etc.

## RCS Basic Option MX847570B-083

This software option simulates RCS services. It is used to perform tests including RCS Configuration, Registration, Instant Messaging, etc.

#### GBA Authentication Option MX847570B-084

This option has the 3GPP GBA Authentication algorithm, authentication procedure and parameter settings for simulating GBA operations.

## IMS Early Media Option MX847570B-085

This software supports IMS Early Media sequence tests. It can be used to confirm customized call tone services at the network side, such as NRBT (Network Ring Back Tone) and CAT (Customized Alerting Tone).

## RTP Frame Control Option MX847570B-086

This option is for controlling media data (RTP packets) during VoLTE communications. It can be used to configure a voice environment in the MUTE status and with fixed data; a measurement environment can be configured for abnormal audio quality verification and battery power consumption tests in a fixed state.

## Support Service (IMS options)

## MX847570B-060 1-Year Technical Support Service MX847570B-TS160

This contract offers customers support for technical enquiries for 1 year.

## MX847570B-061 1 Year Technical Support Service MX847570B-TS161

This contract offers customers support for technical enquiries for 1 year.

<sup>★2:</sup> One timeslot supports two physical channels when 16QAM not used.

## Signalling Tester MD8475B System Configurations/Option/Software

## **WLAN Offload Options**

#### WLAN Offload Basic Option MX847570B-070

This software option provides an EAP authentication server for performing EAP over RADIUS communications (EAP-SIM/EAP- AKA) between a WLAN access point and the EAP authentication server. Additionally, data access by the physical bearers is displayed to verify the 3GPP/WLAN switchover.

## ePDG Option MX847570B-071

This software option provides an ePDG server for testing the UE functions at Untrusted non-3GPP Access by running IKEv2 key exchanges and IPsec communications between the UE and ePDG. It requires the MX847570B-070 option as well.

## ANDSF Option MX847570B-072

This software option provides the ANDSF function for testing the UE functions after ANDSF policy distribution to the UE. It requires the MX847570B-070 options as well.

## Extended ePDG Option MX847570B-073

This software option supports configuration of an ePDG status fault test environment for inserting errors into the ePDG sequence, setting timeouts, etc. Additionally, this option can be used to support Fast Re-Authentication (EAP-SIM/EAP-AKA) tests without the need to generate UE-side authentication keys. It requires the MX847570B-070/ MX847570B-071.

## eCall Options

## eCall Tester (Perpetual License) MX703330E-PL010

This option simulates the PSAP used by eCall services to support the eCall sequence (MSD call  $\rightarrow$  Voice call) between the IVS and PSAP at a road accident.

The following test standards are supported:

- TS 26 .267 V8.6.0 (2011-03)
- TS 26 .268 V8.6.0 (2011-03)
- EN15722: 2015
- EN16062: 2015
- EN16454: 2015
- ISO3779: 2009

This option can be used as a test environment for model authentication in accordance with the EN16454 recommendations. This option provides audio replay and record functions.

## MSD ERA GLONASS Option MX703330E-031

This option supports the MSD data communications function over SMS used by the ERA-GLONASS system

The following test standards are supported:

- GOST R 54619-2011
- GOST R 54620-2011
- GOST R 54721-2011
- GOST R 55530-2013

#### EGTS Server ERA GLONASS Option MX703330E-032

This option provides a test environment to send/receive and encode/decode EGTS messages defined in the GOST R 54619/54620. MX703330E-031 is separately required.

## NG112 LTE eCall Option MX703330E-041

This option provides functional tests for MSD data communication and voice call over IMS defined in the RFC8147 standard.

## Multi-Cell Option MX703330E-061

This option provides the handover test environment required when setting two or more cells as well as the CS Fallback test environment at the eCall environment. Practical eCall module tests are supported using this option.

The cell combinations are as follows:

	LTE	W-CDMA	GSM
LTE*	_	✓	✓
W-CDMA	✓	✓	✓
GSM	✓	✓	✓

<sup>★:</sup> VoLTE is not supported

#### Support Service

## MX703330E 1-Year Support Service MX703330E-SS110

This service contract offers customers 1 year of support for technical enquiries as well as updates to the latest software versions adding extra functionality and bug fixes via downloads from the web page.

## SSM Test PKG European eCall MX847503A-601

This test package provides automated test environment. Opening the test case on the SSM, it shows test procedures of test items defined in the (EC) 2017/79 and EN16454, and automatically configures the setting of MD8475A/MD8475B and eCall tester. This test package also has report functions for each standards.

## SSM Test PKG GOST 33467 MX847503 A-701

This test package provides automated test environment. Opening the test case on the SSM, it shows test procedures of test items defined in the GOST33467, and automatically configures the setting of MD8475A/MD8475B and eCall tester.

This test package also has report functions for each standards.

## Signalling Tester MD8475B System Configurations/Option/Software

## **Scenario Tools**

## SIDE Software MX847580B SIP Option MX847580B-018

These software are for executing scenarios created using the MX843080A Scenario Integrated Development Environment in combination with the MX847510B, MX847520B, and MX847550B software.

## **Ciphering Option**

#### W-CDMA Ciphering Option MX847510B-050

This option adds the W-CDMA ciphering function\*1, \*2 and supports for KASUMI (3GPP-recommended algorithm).

## GSM/GPRS Ciphering Option MX847520B-050

This option adds the GSM/GPRS ciphering function\*1, \*2 and supports both the GSM A5/1, A5/2, and A5/3 ciphering algorithms as well as the GPRS GEA/1, GEA/2, and GEA/3 ciphering algorithms.

## TD-SCDMA Ciphering Option MX847540B-050

This option adds the TD-SCDMA ciphering function\*1, \*2 and supports SNOW 3G (3GPP-recommended algorithm).

## LTE Ciphering Option MX847550B-050

This option adds the LTE ciphering function\*1,\*2 and supports SNOW 3G (3GPP-recommended algorithm) and AES.

- ★1: Does not work with MX847570B.
- ★2: The Integrity Algorithm does not require this option.

## **Upgrade Kits\***

MD8475A to MD8475B Upgrade MD8475B-UG101

MD8475A to MD8475B Upgrade (with Ciphering) MD8475B-UG102

MD8475A to MD8475B Upgrade (with SIDE) MD8475B-UG103

MD8475A to MD8475B Upgrade (with Ciphering/SIDE) MD8475B-UG104

MD8475A to MD8475B Upgrade MD8475B-UG201

MD8475A to MD8475B Upgrade (with Ciphering) MD8475B-UG202

MD8475A to MD8475B Upgrade (with SIDE) MD8475B-UG203

MD8475A to MD8475B Upgrade (with Ciphering/SIDE) MD8475B-UG204

These retrofit kits upgrade the MD8475A in use to the MD8475B.

## MSU Upgrade MD8475B-UG170 MSU Upgrade MD8475B-UG270

When upgrading the MD8475A in use to the MD8475B specifications, if a legacy unit such as the MD8475A-010 or MD8475A-040 is installed that cannot be transferred to the MD8475B-070 Multisignalling Unit, the legacy unit must be changed to the MD8475B-070 with these retrofit kits.

★: Upgrade kit models vary according to the configuration of the MD8475A options in use; contact our sales section for more details.

# eMSU Upgrade MD8475B-UG171 eMSU Upgrade MD8475B-UG271

The MD8475A-011, MD8475A-050 and MD8475A-070 can be changed to the MD8475B-071 when upgrading the MD8475A to the MD8475B.

## eMSU Upgrade MD8475B-UG179 eMSU Upgrade MD8475B-UG279

The MD8475B-070 can be changed to the MD8475B-071.

## **Automation Tool**

## SmartStudio Manager MX847503A

This option increases the efficiency of evaluations by automating manual tests performed by the MX847570B SmartStudio software. In addition, the package includes test sequences required for evaluating basic functions.

## Smartphone Control Platform MX847504A

Using this option, Android OS smartphone operations can be recorded via ADB and UE automated control scripts can be created, edited and run. As well as supporting automated control from the MX847503A, two-way automatic control of the measuring instrument and UE supports an operator-free test environment for higher test efficiency.

# Signalling Tester MD8475B Specifications

RF Connector		RF Input/Output connector (Main, Aux 1, Aux 2)  Connector: N (j) type, Impedance: 50Ω  VSWR (Main): ≤1.9 (350 MHz to 3.8 GHz), ≤2.0 (3.8 GHz to 6.0 GHz)  VSWR (Aux1, 2): ≤1.5 (350 MHz to 3.8 GHz), ≤1.6 (3.8 GHz to 6.0 GHz)  Output connector (DL Output 1 to 8)  Connector: SMA (j) type, Impedance: 50Ω  VSWR: ≤1.5 (350 MHz to 3.8 GHz), ≤1.6 (3.8 GHz to 6.0 GHz)  Reference oscillator  Frequency: 10 MHz  Level: TTL level  Connector: BNC (j) type  Startup characteristics: ≤5 × 10-8 (10 minutes after power-on, referenced to frequency 24 hours after power-on)  Aging rate: 2 × 10-8/day, ≤1 × 10-7/year (referenced to frequency 24 hours after power-on)  Temperature characteristics: ≤5 × 10-8  Frequency Accuracy at Shipment: ±2.2 × 10-8 (At +20° to +30°C, 1 hour after power-up)  External reference input  Frequency: 10 MHz, Acceptable frequency range: ±1.0 ppm, Level: ≥0 dBm, Impedance: 50Ω, Connector: BNC (j) type  Frequency  Frequency range: 350 MHz to 6.0 GHz
		Setting resolution: 100 kHz (Depending on MX847501B used) Accuracy: Based on reference oscillator accuracy Output level Level range: (Main, Aux1, Aux2): LTE: -130 to -27 dBm (350 MHz to 3.8 GHz), -130 to -32 dBm (3.8 GHz to 6.0 GHz) W-CDMA: -130 to -27 dBm (350 MHz to 3.6 GHz) Others: -130 to -25 dBm (350 MHz to 3.6 GHz) Level Range (DL Output 1 to 8): LTE: -115 to -5 dBm (350 MHz to 3.8 GHz), -115 to -10 dBm (3.8 GHz to 6.0 GHz) W-CDMA: -115 to -5 dBm (350 MHz to 3.6 GHz) Others: -115 to -3 dBm (350 MHz to 3.6 GHz) Resolution: 0.1 dB
Transmission Characteristics		Level Accuracy (Main): -120 dBm ≤ Output Level, after CAL, excluding other effects of internal signal generator ±1.7 dB (350 MHz to 3.8 GHz, +20° to +30°C) ±2.0 dB (3.8 GHz to 6.0 GHz, +20° to +30°C)  Level Accuracy (Aux 1, Aux 2): -120 dBm ≤ Output Level, after CAL, excluding other effects of internal signal generator ±1.0 dB ±1.0 dB (350 MHz to 3.8 GHz, +20° to +30°C) ±1.3 dB (3.8 GHz to 6.0 GHz, +20° to +30°C)  Level Accuracy (DL Output 1 to 8): -110 dBm ≤ Output Level, after CAL ±1.0 dB (350 MHz to 3.8 GHz, +20° to +30°C) ±1.3 dB (3.8 GHz to 6.0 GHz, +20° to +30°C)
		Signal purity  Non-harmonic spurious: ≤–30 dBc (at ≥100 kHz frequency offset)  Harmonics: ≤–25 dBc  Modulation Accuracy: At +20° to +30°C  W-CDMA: ≤3.5%rms (350 MHz to 2.7 GHz)  GSM: ≤1.5°rms (350 MHz to 2.7 GHz)  LTE: ≤3.5%rms (400 MHz to 6.0 GHz)
Reception Char	acteristics	Frequency Frequency range: 350 MHz to 6.0 GHz Setting resolution: 100 kHz (Depending on MX847501B used) Level
General		Maximum input level: +35 dBm (Average)  Display: Color TFT LCD screen, 12.1 inches (WXGA), 1280 × 800 dots  External interface  Trigger I/O: BNC (j)  Call Processing Timing I/O: 15-pin mini D-Sub (f) connector  Call Processing Ethernet A/B: RJ-45 connector, 10Base-T/100Base-TX/1000Base-T  Measure Ethernet: RJ-45 connector, 10Base-T/100Base-TX/1000Base-T  Headphone: 3.5-mm dia. headphone jack  Microphone: 3.5-mm dia. microphone jack  USB (Type-A) × 2 (Back Panel)  USB (Type-A) × 4 (Front Panel)  GPIB: IEEE488 connector  VGA: Mini D-Sub connector  Ethernet 0/1: RJ-45 connector, 10Base-T/100Base-TX/1000Base-T  ARB: Mini D-sub connector
		Sync Input: BNC (j) x 1, Output: BNC (j) ×2
Power Supply		100 Vac to 120 Vac (±10%)/200 Vac to 240 Vac (−10%/+10%, Max.: 250 Vac), 50 Hz to 60 Hz (Rating), ≤1350 VA (Max.)
Dimensions and Mass		426 (W) × 221.5 (H) × 578 (D) mm (excl. protrusions), <40 kg (with all options)
Temperature Ra		Operation: +5° to +40°C, Storage: -20° to +60°C, ≤90% (no condensation)
